## WE OFFER

- The opportunity to become a member of a team of designers and site staff who work mainly in the realization of projects related to civil infrastructure and commercial, institutional, hospital, municipal and industrial buildings;
- The opportunity to collaborate with public and private sector stakeholders taking into account all facets of engineering mandates, whether it be its budgeting, planning or implementation;
- A work environment created by a team of committed professionals in a collaborative atmosphere that will allow you to reach your full potential through a multitude of projects;
- A flexible corporate spirit adapted to the needs of the employee in a professional framework;
- A full range of social benefits;
- A skills development program;
- Competitive wages based on the candidate's experience and level of responsibility.

## YOUR PROFILE

- You are a member in good standing of the Association of Professional Engineers and Geoscientists of New Brunswick;
- You have over 10 years of experience in the design and implementation of projects involving various mechanical engineering applications;
- You have a strong interest in the mechanical areas of specialization related to the position, that is:
  - renewable energy;
  - heating;
  - ventilation and air conditioning;
  - plumbing;
  - fire protection;
  - gas and related systems;
  - industrial process equipment and piping.
- You have an in-depth knowledge the National Building Code – Canada and the other codes and main standards to which it refers;
- You master the Microsoft Office 365 Suite applications and AutoCAD and Autodesk Revit programs.

## YOUR QUALITIES

- Good communication skills, verbal and written, in both official languages;
- A genuine team spirit and a true sense of responsibilities;
- A strong interest in construction, computer-assisted design and teamwork in an active work environment;
- An ease of adaptation to various situations, the willingness to overcome design and site challenges, as well as a good understanding of the industry's realities.
