WE OFFER

- The opportunity to become a member of a team of designers and site staff who mainly work in the realization of environmentally related projects for both public and private clients;
- A work environment with a team of committed professionals in a collaborative atmosphere that will allow you to reach your full potential through a multitude of projects;
- A flexible corporate spirit adapted to the needs of the employee in a professional framework;
- A full range of social benefits;
- A skills development program;
- Competitive wages based on the candidate's experience.

YOUR PROFILE

- You hold a Bachelor of Engineering;
- You are a member in good standing of the Association of Professional Engineers and Geoscientist of New Brunswick;
- A minimum of two (2) years of related work experience in the areas described is preferred;
- You possess previous field experience (i.e., sampling, supervision of drilling activities);
- Training in Atlantic Risk-Based Corrective Action (RBCA) would be an asset;
- You are self-motivated, flexible, a team player, and are willing and able to work on a wide variety of projects;
- You are proficient in MS Office;
- You have good technical writing and critical thinking skills;
- You have good communication skills, verbal and written; bilingualism is preferred;
- You have a valid driver's licence and a vehicle;
- You have an ease of adaptation to various situations, the willingness to overcome design and site challenges, as well as good communication of project details in an active work environment.

YOUR QUALITIES

- Complete Phases I, II and III environmental site assessment activities, including research, protocols, supervision of drilling or test pitting work, sampling (soil, water, air) and monitoring;
- Complete hazardous material surveys and mould assessments;
- Complete site remediation work;
- Assist in writing reports and proposals;
- Compile monitoring data;
- Travelling (generally within the province).
