EMPLOYMENT

OPPORTUNITY

WHAT WE OFFER

- The unique opportunity to participate in the creation of a new team of “mechanical/electrical” professionals at our Fredericton/River Valley regional office. This process is part of a broader recruitment strategy aimed at ensuring a gradual and organic growth of the firm’s departments and offices;
- The opportunity to contribute to the work carried out by a team of designers and site personnel who work mainly in the realization of engineering projects related to infrastructures and buildings of a commercial, institutional, hospital, municipal and industrial nature;
- The opportunity to support public and private sector stakeholders in responding to all facets of engineering mandates, whether budgeting, planning or implementation of their projects;
- A work environment created by a team of committed professionals in a collaborative atmosphere that will allow you to reach your full potential through a multitude of concrete achievements;
- A flexible corporate spirit adapted to the needs of employees in a professional framework.

SKILLS REQUIRED

- Proficient in AutoCAD®, Autodesk® Revit and Microsoft Office 365® suite software;
- Good knowledge of the National Building Code of Canada, and other codes and key standards to which it refers;
- A keen interest in computer-assisted design, construction and teamwork;
- Good verbal and written communication skills in both official languages;
- Good organizational skills and an ability to manage priorities within tight deadlines;
- The ability to efficiently perform high-quality work despite frequent interruptions;
- The ability to achieve professional autonomy in an active work environment;
- A sincere team spirit, a real sense of responsibility and an understanding of professional ethics;
- An ease of adaptation to various situations, a willingness to overcome challenges and an understanding of the industry’s reality.

JOB DESCRIPTION

- Participate in the planning, design, quality control and/or management of projects that call on certain areas of the mechanical engineering specialization, namely:
 - Renewable energies;
 - Heating;
 - Ventilation and air conditioning;
 - Plumbing;
 - Fire protection;
 - Gas and related systems;
 - Municipal mechanical systems;
 - Industrial process equipment and piping.
- Perform technical tasks based to the needs specific of ongoing projects, such as:
 - Collecting and recording basic information required for the completion of engineering mandates (i.e., On-site measurements and/or observations, collection of technical data, etc.);
 - Drafting of studies and/or technical reports;
 - Calculation, modelling and design of works;
 - Selection of appropriate construction methods and/or material;
 - Drafting and/or supervision of technical drawings production – computer-assisted drafting (AutoCAD® and Autodesk® Revit);
 - Preparation of technical specifications, and contract terms and conditions;
 - Quantity and/or probable construction cost estimates;
 - Monitoring of work during construction to ensure compliance, cost and/or deadline control;
 - Contract administration.
- Share day-to-day tasks related to the activities of the regional office with existing staff.

SPECIFIC HIRING CRITERIA

- Be licensed as a Professional Engineer with the Association of Professional Engineers and Geoscientists of New Brunswick (APEGNB);
- Possess **ten** years of related work experience in design and/or implementation of mechanical engineering works;
- Own a vehicle and a valid Class 5 driver’s licence: A kilometric allowance will be paid for the use of personal vehicle for work-related travel.
