EMPLOYMENT

OPPORTUNITY

WHAT WE OFFER

- The opportunity to collaborate in the work carried out by a team of designers and site personnel who work mainly in the realization of engineering projects related to civil infrastructure, public and private buildings, as well as the environment;
- The opportunity to support stakeholders from both the public and private sectors by addressing all aspects of engineering mandates, whether it involves budgeting, planning, or implementing their projects;
- A work environment created by a team of committed professionals in a collaborative atmosphere that will allow you to reach your full potential through a multitude of concrete achievements;
- A flexible corporate spirit adapted to the needs of employees in a professional framework.

SKILLS REQUIRED

- Proficient in the Microsoft Office 365® suite software;
- A good knowledge of Canadian environmental regulations and the main standards to which they refer;
- Good verbal and written communication skills in both official languages;
- Good organizational skills and an ability to manage priorities within tight deadlines;
- The ability to efficiently perform high quality work despite frequent interruptions;
- The ability to achieve professional autonomy in an active work environment;
- A sincere team spirit, a real sense of responsibility and an understanding of professional ethics;
- An ease of adaptation to various situations, a willingness to overcome challenges and an understanding of the industry's reality.

JOB DESCRIPTION

- Participate in the planning, coordination and/or quality control of projects that call on certain areas of the **environmental engineering** specialization, namely:
 - Environmental assessments;
 - Environmental permits;
 - Air quality;
 - Effluent management;
 - Habitat valorization and conservation.

- Perform technical tasks and portfolio management according to the specific needs of ongoing projects, such as:
 - Gathering and recording basic information required for engineering mandates, including:
 - Measurement, observation, and/or sampling on site;
 - Collection of technical data;
 - Identification of hazardous materials;
 - Delineation of wetland areas;
 - Surveying of rare plants.
 - Supervising tests and laboratory analyses on materials, including monitoring procedures;
 - Drafting technical studies and/or reports;
 - Monitoring work to ensure control of compliance, costs, and/or project deadlines;
 - Coordinating project-related activities, including fieldwork and reporting on it;
 - Managing personnel and/or subcontractors on site;
 - Fieldwork supervision.
- Share, with the existing personnel, the day-to-day tasks related to the activities of the regional office.

JOB REQUIREMENTS

- Be licensed as a Professional Engineer with the Association of Professional Engineers and Geoscientists of New Brunswick (APEGNB);
- **Two** years of related work experience in a similar role. The equivalent in education, training and experience could be considered.
- Own a vehicle and a valid Class 5 driver's licence: A kilometric allowance will be paid for the use of personal vehicle for work-related travel.
