STUDENT EMPLOYMENT

OPPORTUNITY
SUMMER 2026

WE OFFER

- The opportunity to collaborate in the work carried out by a team of designers and site personnel who work mainly in the realization of projects related to civil infrastructures, public and private buildings, as well as the environment.
- A working environment created by a team of committed professionals and a collaborative atmosphere that will allow you to put into practice the skills and knowledge acquired during your academic career through a multitude of concrete achievements.
- A flexible corporate spirit adapted to the needs of the employee in a professional framework.

YOUR ABILITIES

- Proficiency in Microsoft Office 365® suite software.
- Good verbal and written communication skills in both official languages.
- A sincere team spirit, a real sense of responsibility and an understanding of professional ethics.
- A keen interest in teamwork in an active work environment.
- An ease of adaptation to various situations, a willingness to overcome challenges, as well as an understanding of the realities of the industry.

SPECIFIC HIRING CONDITIONS

- You have completed the 3rd year of one of the following programs, as offered by the University of New Brunswick (UNB):
 - Bachelor of Science in Environmental Engineering;
 - Bachelor of Science in Geological Engineering;
 - Bachelor of Science in Environment and Natural Resources;
 - Bachelor of Science in Environmental Sciences;
 - Bachelor of Science in Environmental Geosciences.
- OR Having completed the 4th year of the Bachelor of Civil Engineering program, as offered by the Université de Moncton (UdeM), or, being enrolled in the Master's in Environmental Studies program at UdeM.
- You own a vehicle and a valid Class 5 driver's licence:
A kilometric allowance will be paid for the use of your personal vehicle for work-related travel.

JOB DESCRIPTION

- Participate in the planning, coordination and/or quality control of projects that call on certain areas of the **environmental engineering** specialization, namely:
 - Environmental assessments;
 - Environmental permitting;
 - Air quality;
 - Effluents;
 - Habitat valorization and conservation.
- Perform technical tasks according to the needs specific to ongoing projects, such as:
 - Collecting and recording basic information required for the completion of engineering mandates, including:
 - On-site measurements, observations and/or sampling;
 - Collection of technical data;
 - Wetland delineation;
 - Identification of hazardous materials;
 - Rare plant surveys.
 - Drafting of studies and/or technical reports;
 - Coordination of project-related activities, including field work and reporting;
 - Site supervision (inspection).
- Share, with the existing personnel, the day-to-day tasks related to the activities of the regional office.

CANDIDATES INTERESTED IN APPLYING FOR THIS EMPLOYMENT OPPORTUNITY
ARE ASKED TO E-MAIL THEIR RESUMÉ BY FEBRUARY 28, 2026
